

A

MY FAVORITE AMPHIBIAN

I chose the Japanese fire-belly because I never have heard of it.

The type of species it is Newt I also have never heard of this species before I joined in this class.

DIET

- Insects
- Other small invertebrate (which means animals that don't have a back bone

THEIR CLASSES

- Class amphibians
- Order salamanders
- Family newts

1. colors orange red yellow
2. female larger than male
3. female lays 200 eggs at once

FROG DISSECTION

VIRTUAL: It was *espied* but *grouse* but not clean. It was *so* not as fun as the real one but it was still fun.

REAL: It was *so* fun it *sounds* like it is not fun but it is fun. You learn but have fun at the same time. This never happens in school.
