

The Chinese Warty it is the Newt because most incredible species.

The Chinese Warty Newt lives in the northeastern coast of China. Mostly because scientific name is *Paramesotriton Chinensis* hard to say I know. The Chinese Newt is even active in the middle of the alpine winter. The Chinese Warty Newt is surprisingly tolerant of life in icy mountain streams. Baby or larval newts closely resemble to their parents.

Their class: Amphibians

The order: Salamanders and newts

The family: Newts and their relatives

HOW 2 MAKE A TERRARIUM

MATERIAL: PEAT MOSS, AQUARIUM GRAVEL, CARBON, TERRARIUM CONTAINER

PROCEDURE: 1.A LAYER OF ROCKS ACROSS BOTTEM OF CONTAINER

2.ADD 1 TSP OF CARBON

3.ADD 4 CUPS OF PEAT MOSS

HOW 2 MAKE A TERRARIUM

PROCEDURE:4.TAKE PLANTS OUT OF POTS SHAKE OFF EXCESS DIRT,DIG SMALL HOLE,PUT IN PLANT ,PACK DOWN GENTLY
