My experience with amphibians

Frog dissection

Virtual~I thought dissecting a frog virtually was kind of cool. I saw all the organs and the different sizes they are. It wasn't that great though because it was just on a computer.

Real~I thought the real dissection was nasty. It was kind of cool taking out all the parts and cutting open the frog. But I liked it a lot even though the smell was horrible.

How to make a terrarium

Materials-peat moss

Aquarium gravel/rocks

Carbon

2 ¼ potted plants

Terrarium container

Procedure-1
