

"My Favorite Amphibian"

I Chose the Tiger Salamander because it's a very large animal and large animals are usually are the most dominant.

- *It eats tadpoles & Salamanders.*
- *They decide to develop into adults on land or in water.*
- *They're part of the Mole Salamander Family.*

- *They could grow up to 12 inches in length.*
- *They mostly live in North America*
- *The Tiger Salamanders scientific name is:*
Ambystoma tigrinum

Class: Amphibian

Order: Salamander &

Family: Mole Salamander.
